THE VIRTUAL CIRCULAR ECONOMY TOUR

In 2021 and 2022, a network of European partners working on circular economy, **toured virtually across Europe** to discover, explore, and promote best practices of SMEs with circular business models.

At **9 tour stops**, companies from different sectors had the chance to showcase their work. We invite you to **watch the videos** of the tour to get inspired by their good practice examples and to use our **networking platform** to get in touch with European pioneers of the circular economy.
